

F. Parretta

Lockport N. Y.
Sept. 10. 1918.

Dear Sir -

When I first heard that help was needed on the farms, I made up my mind that I would go out as a farm cadet. This thought daunted ~~me~~ my mind day after day until finally on the twenty-ninth of April I decided to go out and work on a farm immediately. I was first hired by Mr. Frank Lewis. On his farm

which was a very small one, I worked ten hours each day and received twelve dollars each week. The work on Mr Lewis' farm was mainly with tomatoe plants. For the first week I was watering tomatoe plants and the following two weeks I wheeled tomatoe plants to the greenhouses. From the fourth week to the the seventh week, I helped shipping tomatoe plants. At the end of the sixth week we had all the tomatoe plants shipped and Mr Lewis had no work for me. So at the beginning of the seventh week I was hired by Mr Hirom Dr 'Collum. For two week I working

at this farm, mowing grass with a scythe. This job did not suit me. And on the ninth week I was hired at the Wendt Farm. At this farm the help worked nine hours. But my pay was nevertheless twelve dollars per week. On this farm I did a great deal of hoeing. On the ninth and tenth week I pulled weeds and hoed around the corn. On the eleventh week I picked cherries. On the following week the hay was cut. And from the twelfth to the sixteenth week I was pitching hay. There were about two hundred and sixty tons of hay in the barn when we got done working with the hay. On the sixteenth and

seventeenth ^{weeks} ~~he~~ helped haul thirty acres
of oats and eighteen acres of barley.
On the eighteenth week I picked
apples and plums. I left the farm
on the thirty first of August because I
had to go to school. Farm work is
of great importance. Beside the usefulness
of the produces on the farm; ~~it~~ farm work
work is beneficial to persons. The air is pure
on the farm and it is therefore ~~use~~ a healthy
place to work. There are all kinds of fruits to eat
and fresh water to drink. Anyone having a chance to
work on the farm should take advantage of it, for it is
a healthy place to work.

yours truly,
Francis L. Porretta

Dear Sir

When I first heard
that help was needed on the farms,
I made up my mind that I would
go out as a farm cadet. This
thought daunted on my mind
day after day until finally on
the twenty-ninth of April I decided
to go out and work on a farm
immediately. I was first hired by
Mr. Frank Lewis. On his farm,

which was a very small one, I
worked ten hours each day and
received twelve dollars each week.
The work Mr. Lewis' farm was
mainly with tomatoe plants.
For the first week I was watering
tomatoe plants and the following two
weeks I wheeled tomatoe plants

to the greenhouses. From the fourth week to the seventh week, I helped shipping tomatoe plants. At the end of the sixth week we had all the tomatoe plants shipped and Mr. Lewis had no work for me. So at the beginning of the seventh week I was hired by Mr. Hiron and Mr. Collum. For two week I worked

at this farm, mowing grass with a scythe. This job did not suit me. And on the ninth week I was hired at the Wendt Farm. At this farm the help worked nine hours. But my pay was nevertheless twelve dollars per week. On this farm, I did a great deal of hoeing. On the ninth and tenth week I pulled weeds and hoed around the corn. On the eleventh week I picked cherries. On the following week the hay was cut. And from the twelfth to the sixteenth

week I was pitching hay. There were
about two hundred and sixty tons of
hay in the barn when we got one working
with the hay. On the sixteenth and

seventeenth weeks I helped haul thirty acres
of oates and eighteen acres of barley.

On the eighteenth week I picked
apples and plums. I left the farm
on the thirty first of August because I
had to go to school. Farm work is
of great importance. Besides the usefulness
of the produces on the farm, farm work
is beneficial to the persons. The air is pure
on the farm and it is therefore a healthy
place to work. There are all kinds of fruits to eat
and fresh water to drink. Anyone having a chance to
work on the farm should take advantage of it, for it is
a healthy place to work.

Yours Truly,
