Town of Kirkland Planning Board,

I'm writing in regard of the
proposed "Windmills" on Spring Farm
Cores. I think that Spring Farm or
Anybody should be able to put up windmills on
their property. Everyone complains about the
amount of oil we have to import, but won't
let anyone do anything to help stop the use.
When you mention Chucky's Corners, Paris
Hall or Sky Line Drive, what do you think of?
"Wind". Let's put to use to what God has
given us.

How much time every day do people
spend looking at the horizon? We have such
beauty, you just have to look in another
direction if you don't like to see a windmill.

I don't see them looking as bad as some
homes that are being built on hill tops

Let Bonne, or anyone else put
up windmills and put Nature to work.
When I was a child, most farms had
a windmill to pump their water and
the birds and butterflies survived.

Let the Windmills go up!

Thank you -

Stella M. Lopata
